ECG100G

ECG100G is a kind of single channel electrocardiograph, which features in printing ECG waveform by thermal printing system, prompting for "Lead off" or "Lack of paper", multi-language interface, recording ECG waveform in AUTO/Manual mode, convenient to operate.

Function

- ◆ Adopt digital signal processing technology and get high-quality ECG waveform via power frequency filter, baseline filter and EMG filter of ECG signal.
- ◆ Adopt high-resolution thermal printing system(8 dot/mm), no need for any adjustments. Recording frequency: up to 150Hz.
- ◆ Real-time and continuously record the clear and accurate ECG waveform and annotation character(including lead mark, sensitivity, paper speed and filter state, etc.).
- ◆ In AUTO mode, finish recording by pressing the button once, which improves work efficiency.
- ◆ Multi-language (Chinese, English, French, Italian, German, Spanish and Turkish) interface and report.
- ◆ In optimal DC state, up to 7-hour standby time, continuous print up to 4-hour, record up to 150 ECG waveform.
